intersects with African American history in novel and socially significant ways. Smithsonian's National Museum of African American History and Culture is truly groundbreaking! The first national museum whose mission is to illuminate for all people, the rich, diverse, complicated, and important experiences and contributions of African Americans in America is opening. And the history of NMAAHC--the last museum to be built on the National Mall--is the history of America. The campaign to set up a museum honoring black citizens is nearly 100 years old; building the museum itself and assembling its incredibly far-reaching collections is a modern story that involves all kinds of people, from educators and activists, to politicians, architects, curators, construction workers, and ordinary Americans who donated cherished belongings to be included in NMAAHC's thematically-organized exhibits. Award-winning author Tonya Bolden has written a fascinating chronicle of how all of these ideas, ambitions, and actual objects came together in one incredible museum. Includes behind-the-scenes photos of literally "how to build a museum" that holds everything from an entire segregated railroad car to a tiny West African amulet worn to ward off slave traders. Slavery and emancipation -- The Civil War -- Postwar patterns -- Marriage and family -- Appendix : complete sample documents A comprehensive, entertaining look at heroes, heroines, and critical moments from African American history -- from the slave trade to the Black Lives Matter movement -- by award-winning author Jabari Asim. Jabari Asim goes beyond what's taught in the classroom to reveal a fact-filled history of African American history through politics, activism, sports, entertainment, music, and much more. You'll follow the road to freedom beginning with the slave trade and the middle passage through the abolitionist movement and the Civil War where many African Americans fought as soldiers. You'll learn how slave songs often contained hidden messages and how a 15-year-old Jamaican-born young man named Clive Campbell helped to create hip-hop in the early 1970's. You'll experience the passionate speeches, marches, and movements of the Civil Rights era along with the sacrifices of Martin Luther King, Rosa Parks, Medgar Evers, and many others. Along the way there are dozens of profiles of political trailblazers like Shirley Chisholm, the first black woman elected to Congress in 1968; dominant athletes like Tiger Woods who, in 1995, was only the second

African American to play in a Master's Golf Tournament which he went on to win in 1997; popular musicians like Miles Davis, one the most influential artists of the twentieth century; and inspiring writers like Toni Morrison, the first African American to win the Nobel Prize in literature. Filled with beautiful illustrations by Lynn Gaines that bring these figures and events to life, plus a removable historical timeline poster, *A Child's Introduction to African American History* is a fascinating and comprehensive guide to this often overlooked yet immensely important part of American history. Rising on the National Mall next to the Washington Monument, the National Museum of African American History and Culture is a tiered bronze beacon inviting everyone to learn about the richness and diversity of the African American experience and how it helped shape this nation. *Begin with the Past: Building the National Museum of African American History and Culture* is the story of how this unparalleled museum found its place in the nation's collective memory and on its public commons. *Begin with the Past* presents the long history of efforts to build a permanent place to collect, study, and present African American history and culture. In 2003 the museum was officially established at long last, yet the work of the museum was only just beginning. The book traces the appointment of the director, the selection of the site, and

the process of conceiving, designing, and constructing a public monument to the achievements and contributions of African Americans. The careful selection of architects, designers, and engineers culminated in a museum that embodies African American sensibilities about space, form, and material and incorporates rich cultural symbols into the design of the building and its surrounding landscape. The National Museum of African American History and Culture is a place for all Americans to understand our past and embrace our future, and this book is a testament to the inspiration and determination that went into creating this unique place. First Published in 2000. Routledge is an imprint of Taylor & Francis, an informa company. *The Black History of the White House* presents the untold history, racial politics, and shifting significance of the White House as experienced by African Americans, from the generations of enslaved people who helped to build it or were forced to work there to its first black First Family, the Obamas. Clarence Lusane juxtaposes significant events in White House history with the ongoing struggle for democratic, civil, and human rights by black Americans and demonstrates that only during crises have presidents used their authority to advance racial justice. He describes how in 1901 the building was officially named the "White House" amidst a furious backlash against President Roosevelt for inviting Booker T. Washington to

dinner, and how that same year that saw the consolidation of white power with the departure of the last black Congressman elected after the Civil War. Lusane explores how, from its construction in 1792 to its becoming the home of the first black president, the White House has been a prism through which to view the progress and struggles of black Americans seeking full citizenship and justice. "Clarence Lusane is one of America's most thoughtful and critical thinkers on issues of race, class and power."—Manning Marable "Barack Obama may be the first black president in the White House, but he's far from the first black person to work in it. In this fascinating history of all the enslaved people, workers and entertainers who spent time in the president's official residence over the years, Clarence Lusane restores the White House to its true colors."—Barbara Ehrenreich "Reading *The Black History of the White House* shows us how much we DON'T know about our history, politics, and culture. In a very accessible and polished style, Clarence Lusane takes us inside the key national events of the American past and present. He reveals new dimensions of the black presence in the US from revolutionary days to the Obama campaign. Yes, 'black hands built the White House'—enslaved black hands—but they also built this country's economy, political system, and culture, in ways Lusane shows us in great

detail. A particularly important feature of this book its personal storytelling: we see black political history through the experiences and insights of little-known participants in great American events. The detailed lives of Washington's slaves seeking freedom, or the complexities of Duke Ellington's relationships with the Truman and Eisenhower White House, show us American racism, and also black America's fierce hunger for freedom, in brand new and very exciting ways. This book would be a great addition to many courses in history, sociology, or ethnic studies courses. Highly recommended!"—Howard Winant "The White House was built with slave labor and at least six US presidents owned slaves during their time in office. With these facts, Clarence Lusane, a political science professor at American University, opens *The Black History of the White House (City Lights)*, a fascinating story of race relations that plays out both on the domestic front and the international stage. As Lusane writes, 'The Lincoln White House resolved the issue of slavery, but not that of racism.' Along with the political calculations surrounding who gets invited to the White House are matters of musical tastes and opinionated first ladies, ingredients that make for good storytelling."—Boston Globe Dr. Clarence Lusane has published in *The Washington Post*, *The Miami Herald*, *The Baltimore Sun*, *Oakland Tribune*, *Black Scholar*, and

Race and Class. He often appears on PBS, BET, C-SPAN, and other national media. Rediscover the forgotten story of how President Lincoln welcomed African Americans to his White House in America's most divided and war-torn era. Jonathan White illuminates why Lincoln's then-unprecedented welcoming of African American men and women to the White House transformed the trajectory of race relations in the United States. From his 1862 meetings with Black Christian ministers, Lincoln began inviting African Americans of every background into his home, from ex-slaves from the Deep South to champions of abolitionism such as Frederick Douglass and Sojourner Truth. More than a good-will gesture, the president conferred with his guests about the essential issues of citizenship and voting rights. Drawing from an array of primary sources, White reveals how African Americans used the White House as a national stage to amplify their calls for equality. Even 155 years after the signing of the Emancipation Proclamation, Lincoln's inclusion of African Americans remains a necessary example in a country still struggling from racial divisions today. From the first African communities in North America to the days of slavery, from the aesthetic achievements of the Harlem Renaissance to the political triumphs of the civil rights movement, from Harriet Tubman's creation of the Underground Railroad to the election of Carol Moseley Braun -- the first black woman

senator -- in 1992, this comprehensive book illuminates African Americans both famous and little known. Thousands of entries document historical moments, laws and legal actions, and noteworthy events in the areas of religion, the arts, sports, education, and science and technology. The varied accomplishments of black Americans come to life in brief profiles of Louis Armstrong, Salt-N-Pepa, Zora Neale Hurston, James Baldwin, Joe Louis, Wilma Rudolph, Paul Robeson, General Colin Powell, and hundreds of others. Alphabetically-arranged entries from O to T that explores significant events, major persons, organizations, and political and social movements in African-American history from 1896 to the twenty-first-century. This volume establishes new perspectives on African American history. The author discusses a wide range of issues and themes for understanding and analyzing African American history, the 20th century African American historical enterprise, and the teaching of African American history for the 21st century. Focusing on the making of African American society from the 1896 "separate but equal" ruling of Plessy v. Ferguson up to the contemporary period, this encyclopedia traces the transition from the Reconstruction Era to the age of Jim Crow, the Harlem Renaissance, the Great Migration, the Brown ruling that overturned Plessy, the Civil Rights Movement, and the ascendant influence of African American culture on the

American cultural landscape. Covering African American history in all areas of U.S. history and culture from 1896 to the present, the Encyclopedia contains approximately 1,200 fully cross-referenced entries that are all signed by leading scholars and experts, making this five-volume set the most reliable and extensive treatment to be found on African American history in the twentieth century. The set also contains 500 images and roughly 640 biographies, as well as an entry on each of the fifty states. In addition to its comprehensive coverage of African Americans, the Encyclopedia also contains entries about key figures who affected the lives of African Americans in particular and Americans in general. Unrivalled in breadth and scope, this is the preeminent source of information on this topic and is destined to become a trusted reference source for years to come. Offers a reconstructed history of the United States as seen through the experiences and struggles of African Americans during the Colonial period, slavery, the Civil War, reconstruction, and the Civil Rights era. This comprehensive and entertaining account of African-American history is presented in a fun, engaging, and intelligent way. Significant information in six broad sections includes Great Migrations; Civil Rights and Politics; Science, Inventions, and Medicine; Sports; Military; Culture and Religion. This book is a multifaceted approach to

understanding the central developments in African American history since 1939. It combines a historical overview of key personalities and movements with essays by leading scholars on specific facets of the African American experience, a chronology of events, and a guide to further study. Marian Anderson's famous 1939 concert in front of the Lincoln Memorial was a watershed moment in the struggle for racial justice. Beginning with this event, the editors chart the historical efforts of African Americans to address racism and inequality. They explore the rise of the Civil Rights and Black Power movements and the national and international contexts that shaped their ideologies and methods; consider how changes in immigration patterns have complicated the conventional "black/white" dichotomy in U.S. society; discuss the often uneasy coexistence between a growing African American middle class and a persistent and sizable underclass; and address the complexity of the contemporary African American experience. Contributors consider specific issues in African American life, including the effects of the postindustrial economy and the influence of music, military service, sports, literature, culture, business, and the politics of self-designation, e.g., "Colored" vs. "Negro," "Black" vs. "African American". While emphasizing political and social developments, this volume also illuminates important economic, military, and cultural themes. An

invaluable resource, *The Columbia Guide to African American History Since 1939* provides a thorough understanding of a crucial historical period. Enhanced by nearly 150 images of painting, sculptures, photographs, quilts, and other work by black artists, offers a survey of African American history which covers the predominant political, economic, and demographic conditions of black Americans. Contains 2,200 entries that provide information about African-American history, arranged alphabetically, and featuring a large number of biographies, as well as information about places, events, historical eras, legal cases, cultural achievements, professions, and sports. *The African American People* is the first history of the African American people to take a global look at the role African Americans have played in the world. Author Molefi Kete Asante synthesizes the familiar tale of history's effect on the African people who found themselves forcibly part of the United States with a new look at how African Americans in later generations impacted the rest of the world. Designed for a range of students studying African American History or African American Studies, *The African American People* takes the story from Africa to the Americas, and follows the diaspora through the Underground Railroad to Canada, and on to Europe, Asia, and around the globe. Including over 50 images documenting African American lives, *The African American*

People presents the most detailed discussion of the African and African American diaspora to date, giving student the foundation they need to broaden their conception of African American History. An introduction to the complex relationship between African Americans and the African continent What is an "African American" and how does this identity relate to the African continent? Rising immigration levels, globalization, and the United States' first African American president have all sparked new dialogue around the question. This book provides an introduction to the relationship between African Americans and Africa from the era of slavery to the present, mapping several overlapping diasporas. The diversity of African American identities through relationships with region, ethnicity, slavery, and immigration are all examined to investigate questions fundamental to the study of African American history and culture. The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your

travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race. For use in schools and libraries only. Offers brief biographies of African American educators, entertainers, inventors, authors, athletes, and others who have made important contributions to American life. An intersectional history of the shared struggle for African American and Latinx civil rights Spanning more than two hundred years, *An African American and Latinx History of the United States* is a revolutionary, politically charged narrative history, arguing that the "Global South" was crucial to the development of America as we know it. Scholar and activist Paul Ortiz challenges the notion of westward progress as exalted by widely taught formulations like "manifest destiny" and "Jacksonian democracy," and shows how placing African American, Latinx, and Indigenous voices unapologetically front and center transforms US history into one of the working class organizing against imperialism. Drawing on rich narratives and primary source documents, Ortiz links racial segregation in the Southwest and the rise and violent fall of a powerful tradition of Mexican labor organizing in the twentieth century, to May 1, 2006, known as International Workers' Day, when migrant

laborers—Chicana/os, AfroCubanos, and immigrants from every continent on earth—united in resistance on the first “Day Without Immigrants.” As African American civil rights activists fought Jim Crow laws and Mexican labor organizers warred against the suffocating grip of capitalism, Black and Spanish-language newspapers, abolitionists, and Latin American revolutionaries coalesced around movements built between people from the United States and people from Central America and the Caribbean. In stark contrast to the resurgence of “America First” rhetoric, Black and Latinx intellectuals and organizers today have historically urged the United States to build bridges of solidarity with the nations of the Americas. Incisive and timely, this bottom-up history, told from the interconnected vantage points of Latinx and African Americans, reveals the radically different ways that people of the diaspora have addressed issues still plaguing the United States today, and it offers a way forward in the continued struggle for universal civil rights. 2018 Winner of the PEN Oakland/Josephine Miles Literary Award Every year more colleges and high schools are offering classes (and often making them required classes) in black history. Joanne Turner-Sadler provides a concise and probing treatment of 400 years of black history in America that can be used with age groups ranging from lower high school to college. In African American

History: An Introduction the author touches on key figures and events that have shaped African American culture beginning with a look at Africa and its various civilizations and the migration of the African people to America. Some essential topics covered are: the struggle with slavery, the role African Americans played in America's wars (including the current war in Iraq), race riots and unions, the NAACP, civil rights, and black power movements, the Harlem Renaissance, issues in education, the journey into the West, legal cases such as Plessy vs. Ferguson and Brown vs. Board of Education, African Americans as athletes, entertainers, and statesmen. This book is an indispensable addition to all library collections as well as a teaching tool for instructors. It is heavily illustrated (photos, maps, timelines) with useful end-of-the-chapter questions and activities for further study and includes a handy bibliography of suggested readings and an index. New in this edition is a section on the historic election of Barack Obama, the first African American president of the United States. Interesting connections Obama has to past presidents are explored as well. This edition also contains enhanced discussions of Colin Powell and Condoleezza Rice, and the historic positions both held. Explores how all aspects of American culture, history, and national identity have been profoundly influenced by the experience of African Americans and documents

African American history from the arrival of the first slave ship to the death of Frederick Douglass. A Companion to African American History is a collection of original and authoritative essays arranged thematically and topically, covering a wide range of subjects from the seventeenth century to the present day. Analyzes the major sources and the most influential books and articles in the field Includes discussions of globalization, region, migration, gender, class and social forces that make up the broad cultural fabric of African American history Woodson's classic work of criticism explores how the education received by blacks has failed to give them an appreciation of themselves as a race and their contributions to history. Woodson puts forward a program that calls for the educated to learn about their past and serve the black community. (Education/Teaching) Examines the presence of Africans in America from 1526, when the slaves of a Spanish expedition rebelled and settled among local Native Americans. This souvenir book showcases some of the most influential and important treasures of the National Museum of African American History and Culture's collections. These include a hymn book owned by Harriet Tubman; ankle shackles used to restrain enslaved people on ships during the Middle Passage; a dress that Rosa Parks was making shortly before she was arrested; a vintage, open-cockpit Tuskegee

Airmen trainer plane; Muhammad Ali's headgear; an 1835 Bill of Sale enslaving a young girl named Polly; and Chuck Berry's Cadillac. These objects tell us the full story of African American history, of triumphs and tragedies and highs and lows. This book, like the museum it represents, uses artifacts of African American history and culture as a lens into what it means to be an American. In this landmark guide, nearly two dozen essays by scholars, educators, and museum leaders suggest the next steps in the interpretation of African American history and culture from the colonial period to the twentieth century at history museums and historic sites. This diverse anthology addresses both historical research and interpretive methodologies, including investigating church and legal records, using social media, navigating sensitive or difficult topics, preserving historic places, engaging students and communities, and strengthening connections between local and national history. Case studies of exhibitions, tours, and school programs from around the country provide practical inspiration, including photographs of projects and examples of exhibit label text. Highlights include: Amanda Seymour discusses the prevalence of "false nostalgia" at the homes of the first five presidents and offers practical solutions to create a more inclusive, nuanced history. Dr. Bernard Powers reveals that African American church records are a rich but often

overlooked source for developing a more complete portrayal of individuals and communities. Dr. David Young, executive director of Cliveden, uses his experience in reinterpreting this National Historic Landmark to identify four ways that people respond to a history that has been too often untold, ignored, or appropriated—and how museums and historic sites can constructively respond. Dr. Matthew Pinsker explains that historic sites may be missing a huge opportunity in telling the story of freedom and emancipation by focusing on the underground railroad rather than its much bigger "upper-ground" counterpart. Martha Katz-Hyman tackles the challenges of interpreting the material culture of both enslaved and free African Americans in the years before the Civil War by discussing the furnishing of period rooms. Dr. Benjamin Filene describes three "micro-public history" projects that lead to new ways of understanding the past, handling source limitations, building partnerships, and reaching audiences. Andrea Jones shares her approach for engaging students through historical simulations based on the "Fight for Your Rights" school program at the Atlanta History Center. A exhibit on African American Vietnam War veterans at the Heinz History Center not only linked local and international events, but became an award-winning model of civic engagement. A collaboration between a university and museum that began as a local history project

interpreting the Scottsboro Boys Trial as a website and brochure ended up changing Alabama law. A list of national organizations and an extensive bibliography on the interpretation of African American history provide convenient gateways to additional resources. #1 NEW YORK TIMES BESTSELLER • A chorus of extraordinary voices tells the epic story of the four-hundred-year journey of African Americans from 1619 to the present—edited by Ibram X. Kendi, author of *How to Be an Antiracist*, and Keisha N. Blain, author of *Set the World on Fire*. FINALIST FOR THE ANDREW CARNEGIE MEDAL • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post, *Town & Country*, *Ms. magazine*, *BookPage*, *She Reads*, *BookRiot*, *Booklist* • "A vital addition to [the] curriculum on race in America . . . a gateway to the solo works of all the voices in Kendi and Blain's impressive choir."—The Washington Post "From journalist Hannah P. Jones on Jamestown's first slaves to historian Annette Gordon-Reed's portrait of Sally Hemings to the seductive cadences of poets Jericho Brown and Patricia Smith, *Four Hundred Souls* weaves a tapestry of unspeakable suffering and unexpected transcendence."—*O: The Oprah Magazine* The story begins in 1619—a year before the *Mayflower*—when the *White Lion* disgorges "some 20-and-odd Negroes" onto the shores of Virginia, inaugurating the African presence in what would

become the United States. It takes us to the present, when African Americans, descendants of those on the White Lion and a thousand other routes to this country, continue a journey defined by inhuman oppression, visionary struggles, stunning achievements, and millions of ordinary lives passing through extraordinary history. *Four Hundred Souls* is a unique one-volume "community" history of African Americans. The editors, Ibram X. Kendi and Keisha N. Blain, have assembled ninety brilliant writers, each of whom takes on a five-year period of that four-hundred-year span. The writers explore their periods through a variety of techniques: historical essays, short stories, personal vignettes, and fiery polemics. They approach history from various perspectives: through the eyes of towering historical icons or the untold stories of ordinary people; through places, laws, and objects. While themes of resistance and struggle, of hope and reinvention, course through the book, this collection of diverse pieces from ninety different minds, reflecting ninety different perspectives, fundamentally deconstructs the idea that Africans in America are a monolith—instead it unlocks the startling range of experiences and ideas that have always existed within the community of Blackness. This is a history that illuminates our past and gives us new ways of thinking about our future, written by the most vital and essential voices of our present. ? Understand the historical and

"The most profoundly original cultural history in recent memory." —Henry Louis Gates, Jr., Harvard University "Stunning, timely . . . an achievement in writing public history . . . Teaching White Supremacy should be read widely in our roiling debate over how to teach about race and slavery in classrooms." —David W. Blight, Sterling Professor of American History, Yale University; author of the Pulitzer-prize-winning *Frederick Douglass: Prophet of*

Freedom Donald Yacovone shows us the clear and damning evidence of white supremacy's deep-seated roots in our nation's educational system through a fascinating, in-depth examination of America's wide assortment of texts, from primary readers to college textbooks, from popular histories to the most influential academic scholarship. Sifting through a wealth of materials from the colonial era to today, Yacovone reveals the systematic ways in which this ideology has infiltrated all aspects of American culture and how it has been at the heart of our collective national identity. Yacovone lays out the arc of America's white supremacy from the country's inception and Revolutionary War years to its nineteenth-century flashpoint of civil war to the civil rights movement of the 1960s and today's Black Lives Matter. In a stunning reappraisal, the author argues that it is the North, not the South, that bears the greater responsibility for creating the dominant strain of race theory, which has been inculcated throughout the culture and in school textbooks that restricted and repressed African Americans and other minorities, even as Northerners blamed the South for its legacy of slavery, segregation, and racial injustice. A major assessment of how we got to where we are today, of how white supremacy has suffused every area of American learning, from literature and science to religion, medicine, and law, and why this kind of thinking has so insidiously

endured for more than three centuries. Intended for high school and college students, teachers, adult educational groups, and general readers, this book is of value to them primarily as a learning and reference tool. It also provides a critical perspective on the actions and legacies of ordinary and elite blacks and their non-black allies. Presents questions and answers relating to important periods in African American history including the Revolution, Civil War, Reconstruction, Migration, and the Civil Rights Movement.
