10th Conference on British and American Studies - Crossing
Boundaries
Apr 03 2021 This book consists of a collection of papers
on specific issues centred around three broad areas of scholarly
interest: native language analysis, foreign language acquisition
training, and cultural and literary studies. It provides a concise
snapshot of the multiplicity of vantage points from which language,
literature and culture-related phenomena can be studied and
accounted for. The unifying principle behind the variety of issues
and approaches illustrated here is the overarching notion of
Englishness treated as an object of intellectual inquiry (with a focus
on the English-speaking communities, their cultures, English-based
creole languages) and as a repository of methodological blueprints
applicable in explorations of other languages and cultures. The
authors of the articles included in this volume are academics and
junior researchers who, on the occasion of the 10th Conference on
British and American Studies, convened to share their ideas and
pave the way for further work in intersecting research areas
subsumed under linguistics, sociolinguistics, and cultural studies.

Handbook of Research Design and Social Measurement Oct 29 2020 "If a student researcher had only one handbook on their bookshelf, Miller and Salkind's Handbook would certainly have to be it. With the updated material, the addition of the section on ethical issues (which is so well done that I'm recommending it to the departmental representative to the university IRB), and a new Part 4 on "Qualitative Methods", the new Handbook is an indispensable resource for researchers." --Dan Cover, Department of Sociology, Furman University " I have observed that most instructors want to teach methodology "their way" to imbue their course with their own approach; Miller-Salkind allows one to do this easily. The book is both conceptually strong (e.g., very good coverage of epistemology, research design and statistics) and at the same time provides a wealth of practical knowledge (scales, in-

professional organizations, computer applications, etc.) In addition, it covers the waterfront of methodology." --Michael L. Vasu, Director of Information Technology, North Carolina State University "A unique and excellent reference tool for all social science researchers, and a good textbook for graduate students, senior year undergraduate classes. These students are about to enter the real life of research, and need a handy and comprehensive tool as a starting point that offers shortcuts for getting into research projects. For a small project, the book offers enough information to get the project started. For big projects, the book is ideal for information on where to look for things and examples." --Jianhong Liu, Department of Sociology, Rhode Island College The book considered a "necessity" by many social science researchers and their students has been revised and updated while retaining the features that made it so useful. The emphasis in the new edition is on the tools graduate students and more advanced researchers need to conduct high quality research.

Features/Benefits: Provides step-by-step instruction for student research training by beginning with how to find a creative idea, middle-range theory, and initial hypothesis and proceeds through design, proposal, collection and analysis of data followed by writing, reporting and publication. Section on scales and indices organized so that readers can quickly locate and find the type of scale or index in which they may be interested. All sections are followed by useful and well-considered reference sections so that readers can read more about each topic. Includes updated coverage on new scales, internal and external validity, and new analytic techniques with extensive references on each. Presents extensive coverage of how to prepare manuscripts for publication, including a list of all journals covered by Sociological Abstracts along with

the editorial office address and URL for each entry Discusses the importance of policy research with presentation and discussion of specific models as an adjunct to both applied and basic research techniques Provides extensive coverage of funding opportunities including those offered by the National Institutes of Health, the National Science Foundation, and a directory of private funding sources including relevant contact information New to this edition New Part 4 by John Creswell and Ray Maietta provides a comprehensive introduction to qualitative methods including a review of existing computer applications for collecting and analyzing data New and more current reviews and commentaries have replaced dated or no longer relevant excerpts Thousands of new references on the assessment of important sociological variables as well as references to such topics as statistical analysis and computer applications, and specific topics Thoroughly updated information on the use of computers and online research techniques, including beginning and intermediate material about the Internet and its use by the modern research scientist Cohort and thoughtful review of the most popular statistical analysis software packages New guidelines and discussion of ethical practices in social and behavioral science research, including extensive coverage of institutional review board procedures and activities Expansion of social indicators to include international coverage Plus, there is an extensive and well-organized table of contents with four levels of headings; and, for the first time in the history of the book, a comprehensive index.

Reading and Study Skills Feb 25 2023 By focusing on a wide range of reading and study skills required in the academic world, Reading and Study Skills gives instructors the flexibility to address student needs that might otherwise require several texts. The highly
