Smart Milan Nov 18 2019 This book celebrates Milan's hosting of

the World Exposition (Expo) in 2015 by providing fascinating insights into the city and its history that will appeal to all those visitors to Expo 2015 who wish to understand fully what Milan has to offer and what they are to see there. Combining straightforward language with academic thoroughness, the book traces the evolution of Milan from the previous Expo in 1906 through to the present day. Readers will learn about the innovative contributions made by Milan in many fields, including industry, architecture, scientific research, culture, fashion, design, and food. Today, Milan is a smart city, modern and at the forefront of progress. It is the Italian city always in touch with the world and able to compete with the most progressive foreign cities. During the World Exposition, Milan presents to visitors the best aspects of its history and its way of life. This book is therefore an ideal reference source for visitors seeking to appreciate the past, as well as the potential future, contributions of the city to Italy and the world.

Alfa Romeo Mar 15 2022 It has been 110 years since Alfa Romeo was founded. A name that has become synonymous with cars, so important has its presence been both industrially and in motorsport. Over this long period of time, the celebrated Italian manufacturer has created cars that have become part of motoring history such as the 1900, the Giulietta, the Giulia and the Alfetta. At the same time, Alfa Romeo has enjoyed an outstanding sporting career, winning all of the most significant races and titles, among them the Mille Miglia, the 24 Hours of Le Mans, the Tourist Trophy and the Formula 1 World Championship. This book, which first appeared in 2010 when Alfa Romeo (under the title 'Alfa Romeo 1910-2010') celebrated its first century, was written by the late Maurizio Tabucchi, an expert on the history of the marque, who passed away a few years ago. His work has now been updated to include all the latest models produced from 2017

to the present day such as the Stelvio and the Giulia Quadrifoglio Verde. The book has been completed with an examination of the Alfa Romeo marque's return to competition in partnership with Sauber, demonstrating that its "sporting heart" is still beating as strongly as ever.

The Taylorized Beauty of the Mechanical Oct 18 2019 The dream of scientific management was a rationalized machine world where life would approach the perfection of an assembly line. But since its early twentieth-century peak this dream has come to seem a dehumanizing nightmare. Henry Ford's assembly lines turned out a quarter of a million cars in 1914, but all of them were black. Forgotten has been the unparalleled new aesthetic beauty once seen in the ideas of Ford and scientific management pioneer Frederick Winslow Taylor. In *The Taylorized Beauty of the Mechanical*, Mauro Guillén recovers this history and retells the story of the emergence of modernist architecture as a romance with the ideas of scientific management--one that permanently reshaped the profession of architecture. Modernist architecture's pioneers, Guillén shows, found in scientific management the promise of a new, functional, machine-like--and beautiful--architecture, and the prospect of a new role for the architect as technical professional and social reformer. Taylor and Ford had a signal influence on Bauhaus founder Walter Gropius and on Le Corbusier and his *Towards a New Architecture*, the most important manifesto of modernist architecture. Architects were so enamored with the ideas of scientific management that they adopted them even when there was no functional advantage to do so. Not a traditional architectural history but rather a sociological study of the profession of architecture during its early modernist

period, *The Taylorized Beauty of the Mechanical* provides a new understanding of the degree to which modernist architecture emerged from a tradition of engineering and industrial management.

Bertone Sep 28 2020 For almost a century, Carrozzeria Bertone has created some of the most sensational models in automotive history. The extraordinary concept cars such as the B.A.T.Mobiles, the Testudo, the Canguro, the Carabo and the futuristic Stratos - to mention but a few - were joined by iconic sports cars, such as the numerous Lamborghini Miuras, Marzals, Espadas and Countachs and the Alfa Romeo Montreal, as well as more "down-to-earth" cars that went into mass production. This last category features the Alfa Romeo Giulietta Sprint, the Fiat X1/9 and the Nuova Mini Innocenti along with the many Citroëns designed between the late 1980s and early 2000s. These are just a few of the models featured in the extensive and varied Bertone catalogue to which great designers of the calibre of Giorgetto Giugiaro and Marcello Gandini have contributed. In-depth historical contextualization by Luciano Greggio, a great connoisseur of the Bertone marque, and a magnificent collection of photographs make up this latest volume in the series *Masterpieces of Style*.

Macchi C.202 Folgore May 25 2020 The Macchi C.202 was probably the most successful Italian fighter during the Second World War. It is generally agreed that the performance of the Macchi was superior to both the Hawker Hurricane and the Curtiss P-40 Kittyhawk and on a par with the Supermarine Spitfire Mk. V. It is not by chance that virtually all the Italian top scoring aces flew this plane either with the Regia Aeronautica or the Aeronautica Nazionale Repubblicana. At the same time, the Mc.202 is the symbol of the dysfunctions in the Italian military-industrial complex: the lack of sound industrial planning resulting in orders from the Regia Aeronautica for an exaggerated number of different aircraft; the lack of the development of adequate engines limiting aircraft performance and reducing capacity to house weapons with a proper punch; the corruption of politics and the culpable connivance of the high military spheres. The Mc.202 was therefore produced in limited numbers, while there is consensus that air war, especially in the African theatre, would have been different had the aircraft been adopted before.

Alfa Romeo Spiders, 1910-1992 Apr 23 2020

The Complete Catalogue of the Mini Nov 11 2021 The original Mini was offered in hundreds of variants during its extraordinarily long, 40-year production run. First there were the standard Austin Seven and Morris Mini-Minor saloon, van, pick-up and estate versions. Then came a whole family of Mini-Coopers, the upmarket Wolseley and Riley models, the Moke and the Clubman. It went on from there until there were dozens of models and special editions around the globe, and individual countries applying their own modifications to the Mini. All of these are covered in The Complete Catalogue of the Mini, with photographs, descriptions, specifications, performance figures, and production dates and numbers. Whether you want to look up or identify a particular Mini or simply absorb the enormous range and variety of the Mini's incarnations, this, never attempted before, is the book.
