You Are a Champion Oct 13 2019 I want to show you how you can be a champion in almost anything you put your mind to. Marcus Rashford MBE is famous worldwide for his skills both on and off the soccer field - but before he was a Manchester United and England soccer player, and long before he started his inspiring campaign to end child food poverty, he was just a kid from Wythenshawe, South Manchester. Now the nation's favorite soccer player wants to show YOU how to achieve your dreams, in this positive and inspiring guide for life. Written with journalist Carl Anka, You Are a Champion is packed full of stories from Marcus's own life, brilliant advice and top tips from performance psychologist Katie Warriner. It will show you how to be the very BEST that you can be. It shows kids how to: - Be comfortable with who you are - you can't be a champion until you're happy being you! - Dream big - Practice like a champion - Get out of your comfort zone and learn from your mistakes - Navigate adversity in a positive way - Find your team - Use your voice and stand up for others - Never stop learning With an afterword by Tim S. Grover.

Low-Income Students, Human Development and Higher Education in South Africa May 20 2020 This book explores learning outcomes for low-income rural and

township youth at five South African universities. The book is framed as a contribution to southern and Africa-centred scholarship, adapting Amartya Sen's capability approach and a framework of key concepts: capabilities, functionings, context, conversion factors, poverty and agency to investigate opportunities and obstacles to achieved student outcomes. This approach allows a reimagining of 'inclusive learning outcomes' to encompass the multi-dimensional value of a university education and a plurality of valued cognitive and non-cognitive outcomes for students from low-income backgrounds whose experiences are strongly shaped by hardship. Based on capability theorising and student voices, the book proposes for policy and practice a set of contextual higher education capability domains and corresponding functionings orientated to more justice and more equality for each person to have the opportunities to be and to do what they have reason to value. The book concludes that sufficient material resources are necessary to get into university and flourish while there; the benefits of a university education should be rich and multi-dimensional so that they can result in functionings in all areas of life as well as work and future study; the inequalities and exclusion of the labour market and pathways to further study must be addressed by wider economic and social policies for 'inclusive learning outcomes' to be meaningful; and that universities ought to be doing more to enable black working-class students to participate and succeed. *Low-Income Students, Human Development and Higher Education in South Africa* makes an original contribution to capability scholarship: conceptually in theorising a South-based multi-dimensional student well-being higher education matrix and a rich reconceptualisation of learning outcomes, as well as empirically by conducting rigorous, longitudinal in-depth mixed-methods research on students' lives and experiences in higher education in South Africa. The audience for the book includes higher education researchers, international capability scholars, practitioners and policy-makers.

*Substance Use and Abuse in South Africa* Jul 02 2021 Substance abuse is an enormous social problem in South Africa, as elsewhere. But in South Africa in particular, tik (crystal meth, or methamphetamine) and alcohol are devastating society, aggravating poverty and crime, and contributing to child abuse and gender violence. *Substance Use and Abuse in South Africa* has arisen out of the thriving Brain-Behaviour Initiative (BBI) at the

University of Cape Town, which relates neuroscience and behavioural science to social issues. This ground-breaking book looks at the problem of substance abuse from multiple perspectives and particularly in the light of recent discoveries in brain and behavioural science, but also takes a public health view. Its focus ranges from brain imaging and dopaminergic neurocircuitry to policy and prevention, and is written by local researchers at the cutting edge.

Social Im/mobilities in Africa Nov 13 2019 Grounded in both theory and ethnography, this volume insists on taking social positionality seriously when accounting for Africa's current age of polarizing wealth. To this end, the book advocates a multidimensional view of African societies, in which social positions consist of a variety of intersecting social powers - or 'capitals' - including wealth, education, social relationships, religion, ethnicity, and others. Accordingly, the notion of social im/mobilities emphasizes the complexities of current changes, taking us beyond the prism of a one-dimensional social ladder, for social moves cannot always be apprehended through the binaries of 'gains' and 'losses'.
