The Rust Programming Language (Covers Rust 2018) Jan 21 2020 The official book on the Rust programming language, written by the Rust development team at the Mozilla Foundation, fully updated for Rust 2018. The Rust Programming Language is the official book on Rust: an open source systems programming language that helps you write faster, more reliable software. Rust offers control over low-level details (such as memory usage) in combination with high-level ergonomics, eliminating the hassle traditionally associated with low-level languages. The authors of The Rust Programming Language, members of the Rust Core Team, share their knowledge and experience to show you how to take full advantage of Rust's features--from installation to creating robust and scalable programs. You'll begin with basics like creating functions, choosing data types, and binding variables and then move on to more advanced concepts, such as: • Ownership and borrowing, lifetimes, and traits • Using Rust's memory safety guarantees to build fast, safe programs • Testing, error handling, and effective refactoring • Generics, smart pointers, multithreading, trait objects, and advanced pattern matching • Using Cargo, Rust's built-in package manager, to build, test, and document your code and manage dependencies • How best to use Rust's advanced compiler with compiler-led programming techniques You'll find plenty of code examples throughout the book, as well as three chapters dedicated to building complete projects to test your learning: a number guessing game, a Rust implementation of a command line tool, and a multithreaded server. New to this edition: An extended section on Rust macros, an expanded chapter on modules, and appendices on Rust development tools and editions.

The Direct Path Oct 22 2022 Have you ever done non-dual inquiry and said to yourself, "I understand it intellectually, but I don't feel it. It's not my experience!" If so, The Direct Path, inspired by Sri Atmananda (Krishna Menon), could be for you. This book is the "missing manual" to the Direct Path. For the first time in print, Direct-Path inquiry is presented from beginning to end and beyond, in a user-friendly way. The core of the book is a set of forty experiments designed to help dissolve the most common non-dual sticking points, from simple to subtle. The experiments cover the world, the body, the mind, abstract objects, and witnessing awareness. You are taken step-by-step from the simple perception of a physical object all the way to the collapse of the witness into pure consciousness. Your takeaway is that there's no experiential doubt that you and all things are awareness, openness, and love. Also included are three tables of contents, illustrations, an index, a section on teaching, and the notion of a "post-nondual realization." This book can be utilized on its own or as a companion volume to the author's Standing as Awareness.

Self Remembering Jun 25 2020 With hundreds of books on the market today urging readers to develop mindfulness, pointing to the condition of "awakening" that most religious/philosophical traditions aim toward, this new addition by Red Hawk stands head and shoulders above the crowd. It offers detailed practical guidelines that allow one to know with certainty—not from imagination, theory, thought, or lying-when one is Present and Awake; it details the objective feedback mechanisms available to everyone for attaining this certainty: Am I awake now? How do I know? Sincere readers will find that help in answering these two questions is invaluable and life-changing. Written from

the perspective of a practitioner of more than thirty years—one who has studied the significant work of his predecessors, received instruction from two spiritual masters (Osho Rajneesh and Mister Lee Lozowick), and trained rigorously within daily life. This book is the first detailed examination of the Practice-of-Presence (called "self remembering" in the Gurdjieff tradition). The author's aim is to give general guidelines in this practice, discuss its implications, and then offer specific instruction. *Self Remembering: The Path to Non-Judgmental Love* is meant to be a companion piece, volume ii, to the author's previous book *Self Observation: The Awakening of Conscience*, which is fast becoming a classic. Taken together, they present the most detailed examination of the practice available in English. He clearly points out that self remembering is only one half of a foundational spiritual practice called "self observation/self remembering." Where other authors/teachers have gone wrong in the past is to take only one half of this practice and consider it the whole, entire unto itself. Mister Gurdjieff's student, A.R. Orage (1873-1934), made this mistake with self observation; contemporary teacher Robert Burton made a similar error with his book, also titled *Self Remembering*. While P.D. Ouspensky speaks of the practice of self remembering in his seminal book *In Search of the Miraculous*, and Rodney Collin in *The Theory of Celestial Influence*, there has not been a book-length study on self remembering that examines the practice from the many angles that Red Hawk's does. His chapters cover such diverse yet integrated topics as *The Removal of Self Importance*; *Kaya Sadhana* or the wisdom of the body; and *Separation Grief*, i.e., addressing the terror of our current situation without denial or dramatics.
