Prodromus ad opera omnia S. Bonaventuræ ... Agens de ejus vita, doctrina, et scriptis editis ac ineditis, etc Nov 25 2020

Futility Ending in Disaster Nov 13 2019 As noted in Volume I (The Beginning of Futility) after the Allies had induced Italy to join them against the Central Powers, the Italian Army used the lives of its illiterate peasant fanti as coin advancing to finally endanger Austro-Hungarian defenses. By August, 1917, Viennas generals were convinced that with German help they had to counterattack while Gen. Eric Ludendorff was wary of giving assistance. Finally he was won over after hearing a bold and daring plan later known as blitzkrieg. Italian Intelligence warnings of an enemy offensive were discarded as it was too late in the year. On October 24,1917, Austro-German forces unleashed the first blitzkrieg battle of the century which the Italian Army as the Anglo-French in France in May 1940 could not handle. Using the four commandments of blitzkrieg (deception, infiltration, isolation , annihilation), they quickly advanced 100 miles through the confused Italian defenses halting at the Piave River and adjacent mountains. Unable to handle the assault, many disheartened troops had fled, but later, with heroic deeds, halted the enemy advance. Notwithstanding the great victory, Vienna was negotiating a separate peace with Lloyd George and President Woodrow Wilson both of whom who did not believe the Allies could win.

Digital Mammography Dec 07 2021 This book offers a single publication to be utilised comprehensively as a reference manual within current mammographic clinical practice for use by assistant practitioners and practitioners as well as trainees in radiography and related disciplines. In recent years mammographic clinical practice and technology have evolved rapidly and become increasingly sophisticated, this book will cover these issues. The public feel increasingly empowered to 'have a say' in their care and expectations of their mammography experience is high. Consequently a well-trained, well-informed practitioner is of paramount importance in clinical practice today. This book addresses patient/client-related issues in the form of psychological and emotional support they may require. This will enable the reader to gain insight into the patient/client perspective and thereby assist in meeting their needs.

MLN. Dec 15 2019 MLN pioneered the introduction of contemporary continental criticism into American scholarship. Critical studies in the modern languages--Italian, Hispanic, German, French--and recent work in comparative literature are the basis for articles and notes in MLN. Four single-language issues and one comparative literature issue are published each year.

Evolutionary Multi-Criterion Optimization Mar 18 2020 Multi-criterion optimization refers to optimization problems with two or more objectives expressing conflicting goals that are formulated within a mathematical programming framework. The problems addressed may involve linear or nonlinear objective functions and/or constraints, continuous or discrete variables, and may or may not be affected by uncertainty in the data. This branch of multiple criteria decision making (MCDM) finds application in numerous domains: engineering design, health, transportation, telecommunications, bioinformatics, etc. The concept of a unique optimal solution does not apply as soon as multiple objectives are optimized simultaneously. The models and methods introduced in multi-criterion optimization deal with the concept of a set of efficient (also called Pareto optimal) solutions. Efficient solutions imply trade-offs between the different criteria.

The computation of the efficient solution set may be hard when the size of the problem is large, when the problem is computationally complex, when

the data are not crisp. It is then often impossible to guarantee the computation of exact solutions. In that case, approximate solutions, i. e. , sub-optimal

solutions computed with limited and controlled resources, such as a available time, are of interest. This is the domain of multi-objective metaheuristics, of which evolutionary multi-criterion optimization (EMO) is definitely the most prominent representative. The success of EMO is due to the simplicity of its concepts and the generality of its methods, and is clearly expressed by the many impressive success stories reported in the literature. Research activities in EMO have boomed since the mid-1990s. Three generations of work are identifiable throughout the years.

Episodes in Early Modern and Modern Christian-Jewish Relations Jul 02 2021 The history of the Christian-Jewish relations is full of curious, intense, and occasionally tragic episodes. In the dialectical development of the Western monotheistic religions, Judaism plays the role of the "thesis", of the origins and background for the rise of Christianity and Islam. With the rise of Christianity, Judaism was progressively marginalized, since it was denied the same essence and validity of Christianity, which grew immensely in terms of spiritual and secular power. Christian scholars since the Middle Ages looked at Judaism as at the "broken staff" in the evolutionist line of religion, to quote the insightful work of the late Frank E. Manuel. At the same time, while re-discovering Judaism, Christian scholars redefined themselves, and Christianity as well. However, while Christianity encompassed many sects and many nations, the relatively weak diversity within Judaism, the religion of a single nation, seemed to hinder its evolution and development. While the intellectual battle was fought in a scholarly way, the emergence of the Christian State condemned the Jews to perpetual discrimination and occasional toleration, until a lay State, Nazi Germany, threatened the survival of the Jewish people. Neutral controversial works became powerful extermination tools when used in the political arena. This volume casts light on some crucial episodes in the long dialectics within the same intellectual and religious framework, touching upon themes such as the conception of time future in the age of Spinoza, the

early encounters of Judaism and Christianity in eighteenth-century England, the memory of the Shoah, and the political revolution present in the system of the Jewish Commonwealth. From early to late Modernity, there is a history of friendship and diffidence, mutual understanding and dramatic disagreements, which, even today, largely conditions the Western intellectual world.

Minorities and Small Numbers from Molecules to Organisms in Biology Apr 18 2020 This book provides an accessible introduction to an exciting new field of life science in which the focus is on small numbers of molecules and minorities within cell populations and their significance for the understanding of biological phenomena. Numbers, or quantitative data, are attracting more attention in cell biology following, for example, determination of the absolute copy number of each protein species in each bacterial cell and the recognition of leader cells that drive collective cell migration. Within this context, the authors present recent advances in experimental techniques, biological findings, and theories. A variety of cutting-edge topics and issues are addressed, with explanation of the

ways in which recent developments in the field cast light on seemingly straightforward but difficult-to-answer questions. Readers will learn that we are on the verge of a paradigm shift as the importance of cooperation among groups of molecules in live cells is acknowledged. The book is designed to be enjoyable to read and easy to understand. It will be of interest for a wide range of readers, including young researchers and undergraduate/high school students.

Fundamentals Of Patenting And Licensing For Scientists And Engineers (2nd Edition) May 12 2022 This comprehensive book is the first of its kind to take scientists and engineers beyond simply getting a patent granted. Through the author's extensive technical background and experience in intellectual property licensing, it ties the many technical, legal and business aspects of patent enforcement to the innovation and patenting stage in the patent value chain, with the objective of helping inventors to create valuable patents that can be capitalized. In easy-to-understand language, this book covers various aspects, including basic concepts of patent laws and rules, innovation protection, patenting, patents post-granting and patent licensing. With over 40 tables, 70 figures, nearly 100 cases and examples, and a comprehensive index table, it serves as a practical handbook for inventors and patent practitioners. This second edition incorporates the latest changes in the America Invents Act (AIA), with additional case studies and illustrations throughout the book. For inventors who want to file patents by themselves, this new edition provides guidelines and step-by-step instructions on preparing and filing a US provisional patent application, while avoiding the pitfalls that commonly occur in do-it-yourself patenting.

Coffee and Conflict in Colombia, 1886-1910 Oct 05 2021 The appearance of Coffee and Conflict in Colombia, 1886-1910, had several important consequences for the entire field of Latin American history, as well as for the study of Colombia. Through Bergquist's analysis of this transitional period in terms of what has been called the dependency theory, he has left his mark on all subsequent studies in Latin American affairs; questions of economic development and political alignment cannot be dealt with without confronting Bergquist's work. he has also provided a major contribution to Colombian history by his examination of the growth of the coffee industry and Thousand Days War.
