In recent years there has been a massive upsurge in academic, professional and lay interest in mortality. This is reflected in academic and professional literature, in the popular media and in the proliferation of professional roles and training courses associated with aspects of death and dying. Until now the majority of reference material on death and dying has been designed for particular disciplinary audiences and has addressed only specific academic or professional concerns. There has been an urgent need for an authoritative but accessible reference work reflecting the multidisciplinary nature of the field. This Encyclopedia answers that need. The Encyclopedia of Death and Dying consolidates and contextualizes the disparate research that has been carried out to date. The phenomena of death and dying and its related concepts are explored and explained in depth, from the approaches of varied disciplines and related professions in the arts, social sciences, humanities, medicine and the sciences. In addition to scholars and students in the field—from anthropologists and sociologists to art and social historians - the Encyclopedia will be of interest to other professionals and practitioners whose work brings them into contact with dying, dead and bereaved people. It will be welcomed as the definitive death and dying reference source, and an essential tool for teaching, research and independent study. In *Journey's End*, we write about death, dying, and end-of-life issues. We attempt to define and describe these real-life circumstances, and we discuss ways to proactively deal with them. Multiple personal and professional perspectives provide valuable insights. What is dying like for the dying person, for loved ones, and for those who lend support? Each experience will have unique qualities. While we explore the dying process, we make no assumptions about how any particular death will unfold. In *Journey's End Part 1: Heartfelt Stories of Death and Dying*, our primary focus is the personal accounts of laypeople and of professionals who support dying persons at the end of life. These stories, while unique in detail, hold universal truths for anyone experiencing the end of life. Our intention is to bring the topics of death and dying into the light, to provide a resource that can instruct and inspire compassion and understanding for anyone who is in the midst of their own or another's end-of-life journey. It is a classical anthropological paradox that symbols of rebirth and fertility are frequently found in funerary rituals throughout the world. The original essays collected here re-examine this phenomenon through insights from China, India, New Guinea, Latin America, and Africa. The contributors, each a specialist in one of these areas, have worked in close collaboration to produce a genuinely innovative theoretical approach to the study of the symbolism surrounding death, an outline of which is provided in an important introduction by the editors. The major concern of the volume is the way in which funerary rituals dramatically transform the image of life as a dialectic flux involving exchange and transaction, marriage and procreation, into an image of a still, transcendental order in which oppositions such as those between self and other, wife-giver and wife-taker, Brahmin and untouchable, birth and therefore death have been abolished. This transformation often involves a general devaluation of biology, and, particularly, of sexuality, which is contrasted with a more spiritual and controlled source of life. The role of women, who are frequently associated with biological processes, mourning and death pollution, is often predominant in funerary rituals, and in examining this book makes a further contribution to the understanding of the symbolism of gender. The death rituals and the symbolism of rebirth are also analysed in the context of the political processes of the different societies considered, and it is argued that social order and political organisation may be legitimated through an exploitation of the emotions and biology. For readers of Atul Gawande and Paul Kalanithi, a palliative care doctor's breathtaking stories from 30 years spent caring for the dying. Modern medical technology is allowing us to live longer and fuller lives than ever before. And for the most part, that is good news. But with changes in the way we understand medicine come changes in the way we understand death. Once a familiar, peaceful, and gentle -- if sorrowful -- transition, death has come to be something from which we shield our eyes, as we prefer to fight desperately against it rather than accept its inevitability. Dr. Kathryn Mannix has studied and practiced palliative care for thirty years. In *With the End in Mind*, she shares beautifully crafted stories from a lifetime of caring for the dying, and makes a compelling case for the therapeutic power of approaching death not with trepidation, but with openness, clarity, and understanding. Weaving the details of her own experiences as a caregiver through stories of her patients, their families, and their distinctive lives, Dr. Mannix reacquaints us with the universal, but deeply personal, process of dying. With insightful meditations on life, death, and the space between them, *With the End in Mind* describes the possibility of meeting death gently, with forethought and preparation, and shows the unexpected beauty, dignity, and profound humanity of life coming to an end. The social and cultural changes of the last century have transformed death from an everyday fact to something hidden from view. Shifting between the practical and the theoretical, the professional and the intimate, the real and the fictitious, this collection of essays explores the continued power of death over our lives. It examines the idea and experience of death from an interdisciplinary perspective, including studies of changing burial customs throughout Europe; an account of a "dying party" in the Netherlands; examinations of the fascination with violent death in crime fiction and the phenomenon of serial killer art; analyses of death and bereavement in poetry, fiction, and autobiography; and a look at audience reactions to depictions of death on screen. By studying and considering how death is thought about in the contemporary era, we might restore the natural place it has in our lives. Excerpt from *The Father Confessor: Stories of Death and Danger* The priest stood at the bedside of the dying woman, he looked down upon her and wondered at her face. Her hair had turned pure white, and she so young. Her eyes were the eyes of a hare, full of watching, always seeming to be expecting some sudden fright. Her nervous hands, for ever twitching, kept pulling at the blankets and moving unceasingly. About the Publisher *Forgotten Books* publishes hundreds of thousands of rare and classic books. During a routine investigation, a suspect turns hostile. The officers on the scene spring into action and get the suspect under control by handcuffing him. Though the suspect has been successfully subdued he dies shortly thereafter A psychiatric patient suddenly becomes violent. The hospital staff struggles to control the patient Arguing that death is the central force shaping our social life and order, the author draws on a wide variety of disciplines to provide a broad sociological perspective on the interrelationships of life and death. This book offers a multifaceted exploration of death and the possibilities for an afterlife. By incorporating a variety of approaches to these subjects, it provides a unique framework for extending and reshaping enduring philosophical debates around human existence up to and after death. Featuring original essays from a diverse group of international scholars, the book is arranged in four main sections. Firstly, it addresses how death is or should be experienced, engaging with topics such as near-death experiences, continuing bonds with the deceased, and attitudes toward dying. Secondly, it looks at surviving death, addressing the metaphysics of human persons, the nature of time, the nature of the true self, and the nature of the divine. It then evaluates the value of mortality and immortality, drawing upon the resources of the history of philosophy, meta-analysis of contemporary debates, and the analogy between individual death and species extinction. Finally, it explores what an eternal life might be like, examining the place of selflessness, embodiment, and racial identity in such a life. This volume allows for a variety of philosophical and theological perspectives to be brought to bear on the end of life and what might be beyond. As such, it will be a fascinating resource for scholars in the philosophy of religion, theology, and death studies. *What Does Dead Mean?* is a beautifully illustrated book that guides children gently through 17 of the 'big' questions they often ask about death and dying. Questions such as 'Is being dead like sleeping?', 'Why do people have to die?' and 'Where do dead people go?' are answered simply, truthfully and clearly to help adults explain to children what happens when someone dies. Prompts encourage children to explore the concepts by talking about, drawing or painting what they think or feel about the questions and answers. Suitable for children aged 4+, this is an ideal book for parents and carers to read with their children, as well as teachers, therapists and counsellors working with young children. Did you know that American burial traditions include aerial burial, in which the body is placed in tree branches? Have you ever wondered which religions believe in afterlife or reincarnation? Ever been curious about exactly what the embalming process entails? The answers all lie in *R.I.P.: The Complete Book of Death & Dying* by Constance Jones. Reminding us that almost no subject in the world elicits such universal fascination as death, Jones has masterfully collected information from diverse sources to explore, illuminate, demystify and enrich our understanding of the myriad issues related to death and dying. Publishers Weekly has praised Jones' approach as "clear-sighted" and "fearlessly inquisitive" and calls *R.I.P.: The Complete Book of Death & Dying* "invaluable and oddly uplifting." The book is divided into two parts and is equipped with a resource list of organizations, a bibliography and an index. "Part One" explores the cultural dimensions of death and dying, with chapters and sections on myths and legends explaining death, cultural traditions, the scientific study of death, demographic statistics, funerary customs, religious beliefs and historical anecdotes. Jones provides wide-ranging, informative, and occasionally humorous material that is thoughtfully and clearly organized. Topics covered include descriptions of the physiological changes at the moment of death, a history of cremation, and summaries of legal and ethical issues associated with death, such as capital punishment, euthanasia and suicide. Everyone who is born is someday going to die. Some of us will die peacefully in our sleep, some will die in accidents, and some as the result of diseases, cancer or AIDS. Because we do not usually know when we are going to die, most of us are frightened of death. We do not want to talk about it, do not want to face it, and we run from it as long as we can. And some of us die a lonely death—in a hospital, surrounded by strangers and white sheets, while family and loved ones are kept out of the room at the final moment. Anya Foos-Graber believes that death, like birth, should be a shining, light filled, conscious moment. Death is not a disease. It is the most natural passage we will make since birth. Looking at death before the time comes is like learning about natural childbirth before having a baby. Just as women are choosing to be conscious participants in the birth process, Foos-Graber feels that all of us should be conscious as well of our eventual death—that we should prepare for it the way the Tibetan Buddhists and American Indians used to do. The author calls this process of conscious preparation and practice *deathing*. The book presents two teaching stories, illustrating both a conscious death and an unconscious one. The second half of the book is a step-by-step manual, containing complete instruction and simple exercises—such as breathing, visualization, and the all important, "6th technique," or your chosen "Name and form of God" to which you direct your attention in life and the death transition. You can use the formless LIGHT itself as referent, an absence of any belief structure. A support person rather like the father's presence in natural childbirth can assist in the event of coma, or accident death. Other books have been written about grief, about wills, about taking care of your affairs. This is a book about taking care of yourself, and how to be helpful to someone you care for. *Deathing* has two aims: to make sure that the dying are comfortable and comforted as they die, and to help all of us prepare for the greatest adventure we will face since birth. The national bestselling hit hailed by the *New York Times* as a "vibrant medieval mystery...[it] outdoes the competition." In medieval Cambridge, England, Adelia, a female forensics expert, is summoned by King Henry II to investigate a series of gruesome murders that has wrongly implicated the Jewish population, yielding even more tragic results. As Adelia's investigation takes her behind the closed doors of the country's churches, the killer prepares to strike again. When the end of life makes its inevitable appearance, people should be able to expect reliable, humane, and effective caregiving. Yet too many dying people suffer unnecessarily. While an "overtreated" dying is feared, untreated pain or emotional abandonment are equally frightening. *Approaching Death* reflects a wide-ranging effort to understand what we know about care at the end of life, what we have yet to learn, and what we know but do not adequately apply. It seeks to build understanding of what constitutes good care for the dying and offers recommendations to decisionmakers that address specific barriers to achieving good care. This volume offers a profile of when, where, and how Americans die. It examines the dimensions of caring at the end of life: Determining diagnosis and prognosis and communicating these to patient and family. Establishing clinical and personal goals. Matching physical, psychological, spiritual, and practical care strategies to the patient's values and circumstances. *Approaching Death* considers the dying experience in hospitals, nursing homes, and other settings and the role of interdisciplinary teams and managed care. It offers perspectives on quality measurement and improvement, the role of practice guidelines, cost concerns, and legal issues such as assisted suicide. The book proposes how health professionals can become better prepared to care well for those who are dying and to understand that these are not patients for whom "nothing can be done." This is the second book in a trilogy in the form of fictional novels. The main character travels through time on an adventure called *life*. Volume 2 is told from the perspective of a child growing into an adult, experiencing life on planet earth. The details are not as important as the central theme. As you read this story, keep in mind a basic truth: these are real places for all of us, lifelike situations common to all of us that are meant to be. It is creative, tantalizing, full of insight, touching, absorbing, emotional, beautiful, sympathetic, deeply human, fearful, tragic, and humorous. You may check out other book series: *U Only Get 1: Destination: Planet Earth* Book 1 *The Land of the Living: Into Eternity: Book 3* "As a doctor, I make every effort to strengthen the belief in immortality, especially with older patients when such questions come threateningly close. For, seen in correct psychological perspective, death is not an end but a goal, and life's inclination towards death begins as soon as the meridian is past."--C.G. Jung, commentary on *The Secret of the Golden Flower* ? Here collected for the first time are Jung's views on death and immortality, his writings often coinciding with the death of the most significant people in his life. The book shows many of the major themes running throughout the writings, including the relativity of space and time surrounding death, the link between transference and death, and the archetypes shared among the world's religions at the depths of the Self. The book includes selections from "On Resurrection," "The Soul and Death," "Concerning Rebirth," "Psychological Commentary on *The Tibetan Book of the Dead*" from the *Collected Works*, "Letter to Pastor Pfafflin" from *Letters*, and "On Life after Death." Bringing together ideas from ancient writings to contemporary discussions, *Death* explores recurring global themes regarding the nature of death. *Estimation of the Time Since Death* remains the foremost authoritative book on scientifically calculating the estimated time of death postmortem. Building on the success of previous editions which covered the early postmortem period, this new edition also covers the later postmortem period including putrefactive changes, entomology, and postmortem r While crime is down around the country, many inner city youth continue to die as a result of violence, drugs, AIDS, and other causes. In response to the deaths of its young members, many urban communities paint memorial murals to pay homage to the deceased and express the grief of an entire community. Here, Delgado explores the use of memorial murals for counseling the bereaved friends and family members of urban youth whose lives were cut short. He proposes that employing such approaches can help a community address the problems inherent in their societies while remembering and celebrating the lives of their most vulnerable members. Delgado begins by reviewing the key concepts and practice principles that are essential in any form of urban community social work practice. He details the incidence and nature of the phenomena of death at an early age, and describes the cultural aspects of grief and bereavement in general and as they pertain to the urban communities he observes. Throughout his discussion of the use of memorial murals in social work practice, he provides case studies about real communities and the ways in which they have used the murals to work through the grieving process. The book concludes with a framework and theoretical model for social workers who work with urban populations. This unique work addresses a common urban issue in the context of healing and outreach in a way that will especially appeal to social workers, community leaders and organizations, psychologists, urban sociologists, and students and scholars interested in the ways people deal with death and dying. *New York Times* Bestseller Winner of the *Los Angeles Times* Book Prize Winner of the J. From the authors of the bestselling and genre-defining cocktail book *Death & Co*, *Cocktail Codex* is a comprehensive primer on the craft of mixing drinks that employs the authors' unique "root cocktails" approach to give drink-makers of every level the tools to understand, execute, and improvise both classic and original cocktails. **JAMES BEARD AWARD WINNER • WINNER OF THE TALES OF THE COCKTAIL SPIRITED AWARD® FOR BEST NEW COCKTAIL OR BARTENDING BOOK • NAMED ONE OF THE BEST COOKBOOKS OF THE YEAR BY CHICAGO TRIBUNE** "There are only six cocktails." So say Alex Day, Nick Fauchald, and David Kaplan, the visionaries behind the seminal craft cocktail bar *Death & Co*. In *Cocktail Codex*, these experts reveal for the first time their surprisingly simple approach to mastering cocktails: the "root recipes," six easily identifiable (and memorizable!) templates that encompass all cocktails: the old-fashioned, martini, daiquiri, sidecar, whisky highball, and flip. Once you understand the hows and whys of each "family," you'll understand why some cocktails work and others don't, when to shake and when to stir, what you can omit and what you can substitute when you're missing ingredients, why you like the drinks you do, and what sorts of drinks you should turn to—or invent—if you want to try something new. Praise for *Cocktail Codex* "Learn the template, and any cocktail you can think of is within reach."—*Food & Wine* "Too bad all college textbooks weren't this much fun."—*Garden & Gun* "A must for amateur and pro mixologists alike."—*Chicago Tribune* "If Dora the Explorer turned twenty-one, split herself into three people, and decided to write the *Magna Carta* of booze books, this would be the result. And, unlike every other book you'll read this year, *Cocktail Codex* is packed with actual knowledge you can use in the real world. Please, please, can *Cinema Codex* be next?"—*Steven Soderbergh*, filmmaker

IMPRESSIVE COMMUNICATIONS FROM THE SPIRIT SIDE OF LIFE. Poe, in whose soul was a bed of beautiful flowers, on which the muses seemed to repose and sing their angelic lays, claimed that Nevermore is the most mournful of all words. Byron, whose poetic utterances have never ceased to thrill the mind, attached the same pre-eminence to Farewell. Dr. Johnson, whose erudition still burns with undiminished radiance, entertained the idea that of all phrases, The Last was most touching. Another distinguished writer, whose mind echoes the sad strains of sorrowing souls, affirms that there is more real pathos in the word Gone, than in any other in the English language. But to humanity in the aggregate, the word Dead is the most mournful in its vanishing sound. Speaking of the dead, those who "Died Yesterday," an inspired writer says: "Every day is written this little sentence, 'Died Yesterday.' Every day a flower is plucked from some sunny home, a breach is made in some happy circle, a jewel is taken from some treasury of love, by the ruthless hand of the angel of death. Each day, from the summer-fields of life, some harvester disappears. Yes, every moment some cherished sentinel drops from the rugged ramparts of time into the surging waves of eternity. Even as we write the church-bell tolls the doleful funeral knell of one who died yesterday; its solemn tones chill the blood in our veins, and make the heart sad indeed. 'Died yesterday! Who died? Perhaps it was a gentle, innocent babe, sinless as an angel, pure as the zephyr's gentle music, and whose laugh was as gushing as the summer-rills loitering in a rose-bower, whose life was but a perpetual litany, a Maytime, caowned with blooming, delicate flowers, which never fade. Or, mayhap, it was a youth, hopeful and pr... This book is an interdisciplinary study of death in relation to epilepsy and the Dostoevsky aura. Beginning with Frederic Myers' psychology of death, it develops Leopold Szondi's theories of the familial unconscious, paroxysmal pattern, and the bridge as symbol of the transcendent self. Specific attention is devoted to death-bed visions, bereavement dreams, and near-death experiences, as well as the symbolism of cancer and AIDS deaths. A theology of death is constructed from the biblical imagery of joy and the concept of death as a nonrational shock event. "Occasionally I read a book and say to myself that this is a book that I wished I had written. This is such a book! It is a delightful, practical, interesting, and inspiring book! It is nothing short of a masterpiece in which Papadatou provides the field of death, dying and bereavement with invaluable and constructive insights into the world of caring for the dying and bereaved."--*Grief Matters* "This is a fascinating book, applying important theoretical modelsÖin order to describe and speculate about how professionals manage to work in an environment where suffering and grief are constantly present. This is an important and substantial addition to the mostly self-help literature about self-care for caregivers."--*Doody's Medical Reviews* In the Face of Death explores the experiences of health care professionals who care for the seriously ill, the dying, and the bereaved. In this book, Danai Papadatou offers a practical approach to caregiving, as well as a breadth and depth of insight into both the patient's and the caregiver's responses to death. The author discusses the issues and challenges health care professionals face when treating dying and bereaved patients. Topics include: compassion fatigue, the inevitability of suffering and the potential for growth, suffering in the workplace, team functioning in death situations, and team resilience. The main themes are: The Caring Relationship focuses on the relationship between the care provider and the person who is dying or grieving, and proposes a new, relationship-based model of care The Care Provider in Death Situations addresses the health professional's personal responses to death, using a model that illustrates the grieving process of the health professional The Team in the Face of Death provides recommendations for effective, interdisciplinary care services that support dying or bereaved patients as well as the health care provider #1 New York Times bestselling author J. MISSING IN DEATH When a woman disappears from a New York City ferry, it's a case that only Eve Dallas can solve— because the woman didn't jump, and yet she's not on board. A moving reflection on a subject that touches us all, by the bestselling author of *Claire of the Sea Light* Edwidge Danticat's *The Art of Death: Writing the Final Story* is at once a personal account of her mother dying from cancer and a deeply considered reckoning with the ways that other writers have approached death in their own work. "Writing has been the primary way I have tried to make sense of my losses," Danticat notes in her introduction. "I have been writing about death for as long as I have been writing." The book moves outward from the shock of her mother's diagnosis and sifts through Danticat's writing life and personal history, all the while shifting fluidly from examples that range from Gabriel García Márquez's *One Hundred Years of Solitude* to Toni Morrison's *Sula*. The narrative, which continually circles the many incarnations of death from individual to large-scale catastrophes, culminates in a beautiful, heartrending prayer in the voice of Danticat's mother. A moving tribute and a work of astute criticism, *The Art of Death* is a book that will profoundly alter all who encounter it. This book is open access under a CC BY 4.0 licence. This book is a multidisciplinary work that investigates the notion of posthumous harm over time. The question what is and when is death, affects how we understand the possibility of posthumous harm and redemption. Whilst it is impossible to hurt the dead, it is possible to harm the wishes, beliefs and memories of persons that once lived. In this way, this book highlights the vulnerability of the dead, and makes connections to a historical oeuvre, to add critical value to similar concepts in history that are overlooked by most philosophers. There is a long historical view of case studies that illustrate the conceptual character of posthumous punishment; that is, dissection and gibbeting of the criminal corpse after the Murder Act (1752), and those shot at dawn during the First World War. A long historical view is also taken of posthumous harm; that is, body-snatching in the late Georgian period, and organ-snatching at Alder Hey in the 1990s. Four short stories, abridged and illustrated, by the nineteenth-century American writer best known for his tales of horror. Abstract: Of the many metamorphoses in Apuleius' novel, death is a frequent yet understudied form. On his journey to regain his human identity, Lucius faces many life-threatening experiences, which coincide with other characters' deaths, near-deaths, and apparent-deaths and help create the novel's dark atmosphere. Apuleius also presents metaphorical images of death, as I argue, when he characterizes the loss of identity, e.g., exile and slavery, as a death, a trope with precedent in Roman literature. This dissertation argues that the proliferation of death naturally derives from the novel's folkloric sources, which often address human mortality, and that Apuleius has harnessed this material and other depictions of death to present moments of identity deconstruction and recreation, moments that recall Apuleius' programmatic question *quis ille* ("Who is that?"). This dissertation comprises five independent yet related studies; the first three examine death and narrative, the latter two concern death and the romance. Study 1 argues that necromancy is a metaphor for the act of narrating and even reading the novel. Study 2 shifts to tales about the dead and argues that the bandit's narratives in book 4 serve as a funeral oration that aims at commemorating false identities of the dead robbers. Study 3 then examines the paradox of preserving the memories of fictional characters, i.e., people who never existed, by exploring such instances in the *Metamorphoses* and other works of prose fiction and concludes that ancient fiction was used to critique and perhaps mock antiquity's obsession with postmortem commemoration. The second half focuses on Apuleius' use of death motifs popular in the Greek romances, texts that all begin with the protagonists experiencing a metaphoric death. While these deaths result in a rebirth at the end of the romances, the *Metamorphoses* presents Lucius as not wholly reborn. This is evident in Lucius' depiction as a death-doomed bride (study 4) and further supported by an examination of the symbolism of the rose in the *Metamorphoses* and the romances. This flower restores Lucius' human form but also robs him of his human identity, prolonging his death-like existence even after his anamorphosis (study 5). An "absolutely magnificent" book (*The New Republic*)—the fruit of almost two decades of study—that traces the changes in Western attitudes toward death and dying from the earliest Christian times to the present day. A truly landmark study, *The Hour of Our Death* reveals a pattern of gradually developing evolutionary stages in our perceptions of life in relation to death, each stage representing a virtual redefinition of human nature. Starting at the very foundations of Western culture, the eminent historian Philippe Ariès shows how, from Graeco-Roman times through the first ten centuries of the Common Era, death was too common to be frightening; each life was quietly subordinated to the community, which paid its respects and then moved on. Ariès identifies the first major shift in attitude with the turn of the eleventh century when a sense of individuality began to rise and with it, profound consequences: death no longer meant merely the weakening of community, but rather the destruction of self. Hence the growing fear of the afterlife, new conceptions of the Last Judgment, and the first attempts (by Masses and other rituals) to guarantee a better life in the next world. In the 1500s attention shifted from the demise of the self to that of the loved one (as family supplants community), and by the nineteenth century death comes to be viewed as simply a staging post toward reunion in the hereafter. Finally, Ariès shows why death has become such an unendurable truth in our own century—how it has been nearly banished from our daily lives—and points out what may be done to "re-tame" this secret terror. The richness of Ariès's source material and investigative work is breathtaking. While exploring everything from churches, religious rituals, and graveyards (with their often macabre headstones and monuments), to wills and testaments, love letters, literature, paintings, diaries, town plans, crime and sanitation reports, and grave robbing complaints, Ariès ranges across Europe to Russia on the one hand and to England and America on the other. As he sorts out the tangled mysteries of our accumulated terrors and beliefs, we come to understand the history—indeed the pathology—of our intellectual and psychological tensions in the face of death. The Valiant heroes. X-O Manowar. Bloodshot. Ninjak. The Harbinger Renegades. Unity. This is how they lived. This is how they died. Now we know. The *Book of the Geomancer* has recorded it all. But only a young girl ð the last in a line of the enigmatic mystics who protect the Earth known as Geomancers ð has seen this future come to pass, from the coming cataclysm to the dawn of the 41st century. Alone with her sworn protector, the Eternal Warrior ð a soldier battle-forged across five thousand years of combat ð the duo must defy their allies to stop the Dark Age that now threatens to eclipse our world. Together, they are the number one target of every hero and villain on Earth. Either the Eternal Warrior hands her overËor they take him down. But can even he single-handedly protect one child when the entire Valiant Universe wages war against him? New York Times best-selling writer Robert Venditti (X-O MANOWAR) joins superstar-in-the-making Robert Gill (Batgirl) and visionary artist Doug Braithwaite (ARMOR HUNTERS) to begin a thousand-year journey into the future of the Valiant UniverseÉand rain, fire, blood and war on the heroes of today. **Collecting BOOK OF DEATH #1**ð4.
