Seminar paper from the year 2013 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 1,7, University of applied sciences, Cologne, course: International Strategy and Sales Management, language: English, abstract: This assignment describes the Blue Ocean Strategy as an innovation concept within the corporate strategic management on the example of IKEA. This is to be done by analysing the framework and the tools of the Blue Ocean Strategy by considering both basic principles and practical implementation. The Blue Ocean Strategy aspires to turn strategic management on its head by putting "value innovation" in front of "competitive advantage" as the basically goal to create consumer demand and exploit untapped markets. When IKEA entered the market in the late

1950s they focused on the important factors that buyer value and make them to co-producers by implementing unique do-it-yourself mentality. Therefore IKEA combined differentiation with a cost leadership and created a blue ocean helping the founder Ingvar Kamprad to become one of the wealthiest people in the world. As the current business world continues moving towards a faster, more global environment in which there are more and more competitors trying to grab a piece of the pie, the need to develop blue oceans has never been greater. 101 management theories from the world's best management thinkers - the fast, focussed and express route to success. As a busy manager, you need solutions to everyday work problems fast. The Little Book of Big Management Theories gives you access to the very best theories and models that every manager should know and be able to use. Cutting through the waffle and hype, McGrath and Bates concentrate on the theories

that really matter to managers day-to-day. Each theory is covered in two pages - telling you what it is, how to use it and the questions you should be asking - so you can immediately apply your new knowledge in the real world. The Little Book of Big Management Theories will ensure you can: Quickly resolve a wide range of practical management problems Be a better, more decisive manager who gets the job done Better motivate and influence your staff, colleagues and stakeholders Improve your standing and demonstrate that you are ready for promotion All you need to know and how to apply it - in a nutshell. The book illustrates literature about red ocean strategies - those strategies which are meant to get ahead the competition in the areas of business when there is too much competition faced by the companies into five categories; the strategic management way, marketing mix P's way, entrepreneurial way, traditional business

communities way and good strategies. It also lays down ten simple rules of red ocean strategy found to be common in these strategies. Ten years ago, world-renowned professors W. Chan Kim and Renee Mauborgne broke ground by introducing "blue ocean strategy," a new model for discovering uncontested markets that are ripe for growth. In this bound version of their bestselling Harvard Business Review classic article, they apply their concepts and tools to what is perhaps the greatest challenge of leadership: closing the gulf between the potential and the realized talent and energy of employees. Research indicates that this gulf is vast: According to Gallup, 70% of workers are disengaged from their jobs. If companies could find a way to convert them into engaged employees, the results could be transformative. The trouble is, managers lack a clear understanding of what changes they could make to bring out the best in everyone. In this article, Kim and Mauborgne

offer a solution to that problem: a systematic approach to uncovering, at each level of the organization, which leadership acts and activities will inspire employees to give their all, and a process for getting managers throughout the company to start doing them. Blue ocean leadership works because the managers' "customers"--that is, the people managers oversee and report to--are involved in identifying what's effective and what isn't. Moreover, the approach doesn't require leaders to alter who they are, just to undertake a different set of tasks. And that kind of change is much easier to implement and track than changes to values and mind-sets. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless

managers around the world--and will have a direct impact on you today and for years to come. OVER 4 MILLION COPIES SOLD WALL STREET JOURNAL AND BUSINESSWEEK BESTSELLER RECOGNIZED AS ONE OF THE MOST ICONIC AND IMPACTFUL STRATEGY BOOKS EVER WRITTEN The global phenomenon that has sold over 4 million copies, is published in a record-breaking 46 languages and is a bestseller across five continents--now updated and expanded with new content. Named by Fast Company as one of the most influential leadership books in its Leadership Hall of Fame. A strategy classic. In this perennial bestseller, embraced by organizations and industries worldwide, globally preeminent management thinkers W. Chan Kim and Renee Mauborgne challenge everything you thought you knew about the requirements for strategic success. Recognized as one of the most iconic and impactful strategy books ever written,

BLUE OCEAN STRATEGY, now updated with fresh content from the authors, argues that cutthroat competition results in nothing but a bloody red ocean of rivals fighting over a shrinking profit pool. Based on a study of 150 strategic moves (spanning more than 100 years across 30 industries), the authors argue that lasting success comes not from battling competitors but from creating "blue oceans"--untapped new market spaces ripe for growth. BLUE OCEAN STRATEGY presents a systematic approach to making the competition irrelevant and outlines principles and tools any organization can use to create and capture their own blue oceans. This expanded edition includes: A new preface by the authors: Help! My Ocean Is Turning Red Updates on all cases and examples in the book, bringing their stories up to the present time Two new chapters and an expanded third one--Alignment, Renewal, and Red Ocean Traps --that address the most pressing questions readers have asked

over the past 10 years A landmark work that upends traditional thinking about strategy, this bestselling book charts a bold new path to winning the future. Consider this your guide to creating uncontested market space--and making the competition irrelevant. To learn more about the power of BLUE OCEAN STRATEGY, visit blueoceanstrategy.com. There you'll find all the resources you need--from ideas in practice and cases from government and private industry, to teaching materials, mobile apps, real-time updates, and tips and tools to help you make your blue ocean journey a success. Value innovation: the strategic logic of high growth -- Fair process: managing in the knowledge economy -- Creating new market space -- Knowing a winning business idea when you see one -- Charting your company's future -- Tipping point leadership -- Blue ocean strategy -- How strategy shapes structure -- Blue ocean leadership -- Red ocean traps Business is waking up to a

global shortage of resources of every kind. Raw materials are running out, whether in Tokyo or Quito. While businesses have toyed with the idea of sustainability as a means to market to eco-minded consumers, this book shows that scarcity must become central to their thinking and the key driver of strategic innovation. Blue Ocean Strategy: How to Create Uncontested Market Space and Make the Competition Irrelevant Blue Ocean Strategy, Expanded Edition: How to Create Uncontested Market Space and Make the Competition Irrelevant acts as a 2015 version to update the original text covering business strategy, first published in 2005. This is a classic handbook offering practical strategies for business students or entrepreneurs who want to get ahead of the competition, break new ground in uncharted territory, and earn access to widespread opportunities for growth, as well as gain a previously under-utilized base of customers. Typically,

businesses will mistakenly focus upon competitors when creating strategies. A business that is labelled as a "blue ocean," however, will shift their focus to creating value for their customers, which could include those customers yet to be attained. "Blue ocean" is terminology which comes from picturing new market space as crystal clear, blue waters of unexplored ocean. Conversely, a "red ocean" describes the antithesis, where frequent and heavy competition creates a red, or bloody, rivalry. This is a summary and analysis of the book and NOT the original book This Book Contains: * Summary Of The Entire Book * Chapter By Chapter Breakdown * Analysis Of The Reading Experience Download Your Copy Today As established markets become less profitable, companies increasingly need to find ways to create and capture new markets. Despite much investment and commitment, most firms struggle to do this. What, exactly, is getting in their way? World-renowned

professors W. Chan Kim and Renee Mauborgne, the authors of the best-selling book Blue Ocean Strategy have spent over a decade exploring that question. They have seen that the trouble lies in managers' mental models--ingrained assumptions and theories about the way the world works. Though these models may work perfectly well in mature markets, they undermine executives' attempts to discover uncontested new spaces with ample potential (blue oceans) and keep companies firmly anchored in existing spaces where competition is bloody (red oceans). In this bound version of their bestselling Harvard Business Review classic article, they describe how to break free of these red ocean traps. To do that, managers need to: (1) Focus on attracting new customers, not pleasing current customers; (2) Worry less about segmentation and more about what different segments have in common; (3) Understand that market creation is not synonymous

with either technological innovation or creative destruction; and (3) Stop focusing on premium versus low-cost strategies. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world--and will have a direct impact on you today and for years to come. My paper explains about the meaning and importance of blue ocean strategy. It also explains Red Ocean strategy. In this paper few companies who are using blue and red ocean strategies are discussed. In this paper I have tried to explain value innovation. I also tried to explain analytical tools and framework. I also tried to high light the characteristics of blue ocean strategies. I also tried to explain the four action framework of blue ocean

strategy. I also tried to explain strategies related to the reconstruction of market boundaries. The paper also high lights on non 3 tiers of non-customers. I also tried to explain the sequence of blue ocean strategy model. Six paths to blue ocean strategy are also discussed. T model, Buyer's Utility Map and Pioneer Migrator Settler Maps are also discussed. Essay from the year 2021 in the subject Business economics - Business Management, Corporate Governance, grade: 1,0, University of Applied Sciences Essen, language: English, abstract: Nowadays, companies are required to be constantly willing to change in order to achieve efficient business success. This is due to the fact that markets today are characterized by extensive saturation and overcrowding of competing companies. Finally, the large quantity of products and services on offer is hardly differentiable for consumers. The challenges listed above confirm that systematic and efficient innovation

management is necessary to secure the existence and future orientation of companies.

Within the tourism industry, in particular, there is enormous pressure to innovate due to global competition and the growing expectations of guests. However, tourism businesses are not known for being innovative, they tend to copy showcase examples. This is because there is often a lack of money for research and development, as well as time, as it is already a major challenge to perform the day-to-day tasks. According to a study by PwC, innovative companies should grow faster, generate more revenue and thus represent a key success factor for companies.

Therefore, the question of how to embed systematic innovation management in a company is increasingly coming to the fore. One option used when embedding innovation management in companies is the Blue Ocean Strategy. What exactly is meant by the Blue Ocean strategy and how it works will be explained and

demonstrated in more detail in this paper. Furthermore, the focus of this scientific essay is to answer the question of to what extent the application of the Blue Ocean strategy within the tourism industry can contribute to its success. This will be analyzed and explained using the example of the "CitizenM" - Hotel chain. In particular, reference will be made to its focus, divergence, and compelling tagline.

Seminar paper from the year 2008 in the subject Business economics - Business Management, Corporate Governance, grade: 1,7, Hamburg University of Applied Sciences, course: Marketing Strategien, language: English, abstract: In a business context, it is inevitable that one of the main words one would hear is competition. In a way doing business is like participating in a competition for market share, profits etc. Even one of the basic theories of trade, the one of Ricardo, speaks about the competitive advantage and its importance. But how to become successful in doing

business? Does a recipe exist which guarantees that a business could thrive and be successful? On the one hand one could argue that business opportunities arise from the environment, lead by an "invisible hand" and the essentials of doing business are similar to the one centuries ago and that people do not have substantial influence. On the other hand, others would argue that the success of a business is predominantly result of the well-prepared planning and in that way is connected more to the human (merchant's) abilities rather than to the environment itself. Surely, the centuries of business history has shown that answering the question what makes a business successful does not have a clear answer. It would be very shallow way of thinking to give a simple answer to this question. Surely, the environment plays an important role for the business but the other way round, doing business is not a random game. In contrast, only thinking strategically without being in

the appropriate environment and without any resources, it is quite impossible to set up a successful business.

Furthermore, the business environment is not static but instead very dynamic. As the time passes by, businesses change and what was true about business success centuries or even a decades ago, is not true any more. At the same time, it does not mean that business now and in the past has nothing in common. On the contrary, nowadays t In *Blue Ocean Strategy*, W. Chan Kim and Renée Mauborgne tackle the central problem facing all businesses: how to perform better than your competitors? Their solution involves taking a creative approach to the normal view of competition. In the normal framework, competition is a zero-sum game: if there are two companies competing for the same market, as one does better, the other has to do worse. The authors' creative leap is to suggest one can beat the competition by not

competing. Companies should avoid confronting competitors in crowded marketplaces, what they call “red oceans,” and instead seek out new markets, or “blue oceans.” Once the blue oceans have been identified, companies can get down to the task of creating unique products which exploit that market. Chan and Mauborgne argue, for example, that a wine company might decide to start appealing to a group previously uninterested in wine. This would be a “blue ocean” market, giving the winemaker a huge advantage, which they could exploit by creating a wine that appealed to the tastes of a beer-drinking demographic. A classic of business writing, Blue Ocean Strategy is creative thinking and problem solving at its best. An Easy to Digest Summary Guide... **BONUS MATERIAL AVAILABLE INSIDE** The Mindset Warrior Summary Guides, provides you with a unique summarized version of the core information contained in the full book, and the essentials you need in order to

NOTE: To Purchase the "Blue Ocean Strategy"(full book); which this is not, simply type in the name of the book in the search bar of Amazon Bachelor Thesis from the year 2013 in the subject Hotel Industry / Catering, grade: 1,7, International Business School Nürnberg, course: Hotelmanagement, language: English, abstract: The hospitality industry experiences abundant growth rates, although it is one of the

world's toughest markets. Therefore, entrepreneurs need to aim for differentiation in order to gain an uncontested market position. Blue Oceans are more than a natural wonder and a loophole for mass-market participants: It is an efficient strategy management tool that focuses on finding innovative business concepts and thus the key to success for adaptive companies. In contrast to saturated Red Oceans, Blue Oceans feature value innovation through an adjusted offering with costs benefits. Similar to the Darwin's "Survival of the Fittest"-approach the Blue Ocean Strategy depends on customizing and enhancing an already existing concept with innovative features. In such highly competitive markets, monopolists - those who are able to find a market niche - exhibit the best chances for economic success. W Hotels and MotelOne are two well-established paradigms for innovativeness in the hospitality industry. While W

Hotels succeeded in adopting an exclusive lifestyle hotel destination with a focus on design, fashion and music, MotelOne concentrated on a premium low-cost oriented design-approach. Together both parties reinvented their segment through implementing trailblazing new concepts combined with the value-adding design factor. Moreover, Blue Oceans need to eliminate dispensable options, as W is less formal and more liberal than all its competitors, whereas MotelOne discarded unprofitable amenities like telephones, minibars or room service. The economic surplus derives from wider target groups as well as higher profit margins, which is why trendsetting Blue Oceans are classified as a future-proof and promising corporate path. Seminar paper from the year 2010 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: A, University of Massachusetts Boston, language: English, abstract: In

the competitive world of business, any organization has to evolve different strategies to strive hard to achieve its goal and be there in the competition. Organizations identify, plan and manufacture products and provide services, so that it doesn't face stiff competition from its rivals but makes its rivals compete with it. In order to make this possible, company need to market its products and services through the best mediums available and make the consumer conscious about the product. Marketing is an essential and important tool of any successful business. Scott (2006) states that companies without marketing mindset are at a disadvantage in today's business world that are product centric rather than customer centered. The overall concept of Blue Ocean Strategy is innovation. It is understood from the book that companies should identify, plan a strategy and create a business of which no competition exists. Kim and Renee (2005) divide the competitive business world into

two segments of Red Ocean and Blue Ocean. It is further explained that 'Red Ocean' is the business world full of competition where the existing organizations compete with each other to acquire its share in the market whereas 'Blue Ocean' is the unidentified market area. The Blue Ocean is the space wherein the business is new in the market and has no threat of competition instead it has to create competition. The giants of particular commodity or product or services, who are termed as leader, find it difficult to survive in the competitive world of business without marketing. American Marketing Association has defined marketing as the performance of the business activities that direct the flow of goods and services from producer to consumer or user. Marketing assists in identifying specific markets for products and services, guiding the development of products, packages, and services, etc. (Kumar) In blue ocean strategy this concept has a new

meaning and a new method to implement in the firms. Blue ocean marketing concept proposes a method based on the segmented target group and the product development and marketing is based on the conduct of this group. The concept is good but cannot be fitted with all firms and their marketing procedures as it lack competition, which is vital in the marketing concept. Bachelor Thesis from the year 2013 in the subject Business economics - Business Management, Corporate Governance, grade: 1,3, University of Applied Sciences Essen, language: English, abstract: As there are four big players so called integrators and many local small and medium sized companies in the German Courier, Express and Parcel (CEP) market, this thesis shall investigate if it is possible to create blue oceans within the defined market. Furthermore it is investigated what kind of strategies are needed to sell at increased pricing levels in a matured market environment like the

German CEP industry. It shall provide a summary of established corporate strategies in comparison to the new strategic management approach of blue ocean strategy. The main objective is to investigate current levels of competition within the German CEP market via the research of CEP market leaders in each segment to finally develop a blue ocean strategy concept. The best of W. Chan Kim and Renée Mauborgne's articles on blue ocean strategy, all in one place. The seminal book Blue Ocean Strategy has sold over 4 million copies globally and is in print in 46 languages. But much of W. Chan Kim and Renée Mauborgne's work on creating new market spaces was originally published in the pages of Harvard Business Review. This book brings the best of those articles together all in one place. Piece by piece, these articles explain the process of creating "blue oceans"--uncontested market spaces, untainted by competition. Kim and Mauborgne introduce tools for

exploring and exploiting these markets, such as the Value Curve, the Strategy Canvas, the Price Corridor of the Mass, and the Business Model Guide—tools that have come to make up the blue ocean strategy framework. This collection also features the authors' latest Harvard Business Review article, "Red Ocean Traps." Whether or not you're familiar with blue ocean strategy, this book will give you a new perspective on this important framework—and help you implement it in your organization. This volume includes the articles "Value Innovation: The Strategic Logic of High Growth," "Fair Process: Managing in the Knowledge Economy," "Creating New Market Space," "Knowing a Winning Business Idea When You See One," "Charting Your Company's Future," "Tipping Point Leadership," "Blue Ocean Strategy," "How Strategy Shapes Structure," "Blue Ocean Leadership," and "Red Ocean Traps: The Mental Models That Undermine

Market-Creating Strategies." If IT companies seek to differentiate themselves from the competition, they must turn to consultative selling. Consultative selling is analyzing the needs and challenges of your customers and selling unique services that enable your customers to reduce costs, increase profits, and improve overall business performance. *The Art of Consultative Selling in IT* provides a practical framework for becoming a successful consultative seller and shows how to use the blue ocean strategy to identify opportunities in areas where there is no competition. The first section discusses the advantages of consultative selling and explores the concepts of blue oceans. In blue oceans, demand is created rather than fought over. Competition is irrelevant because the rules of the game are waiting to be established. The author explains how you can use consultative selling techniques to create your own blue oceans of unknown

market space, where opportunities for growth are both rapid and profitable. In the second section, the author defines the consultative selling framework (CSF). This framework is based on proven processes, best practices, and real-time case studies to make consultative selling a reality. It provides clear guidelines for understanding your customer's current landscape and challenges, owning its priorities, and helping it to achieve its short-term and long-term goals. The author explains how to use CSF to generate innovative ideas and present them to your customer through profit improvement or efficiency improvement proposals. The book concludes with examples of several innovative business improvement ideas that you can present to your customers, including Agile project management, master data management (MDM), application portfolio rationalization, and business process management (BPM). The author discusses the

benefits of each methodology and lists the trigger points to think about when deciding whether the methodology can add value to a pa This book collects many ideas under the "Describe Less, Think More" or DLTM principle, formulates a strategic way of evaluating and managing several situations in the VUCA world called "Dark Ocean Strategy", and invite readers to find out the answers to these questions ... 1.What do you know about the business situation or living environment around you?2.What you should know about the business situation or living environment around you?3.What does VUCA mean to your leadership and your strategies?4.How dark is your life/business?5.What is the worth metrics and systems thinking for competitive advantage in the VUCA world? Includes Analysis · Overview of the Book · Important People · Key Takeaways · Analysis of Key Takeaways About the Author With Instaread, you can get the key takeaways, summary and analysis of a book in 15 minutes. We read every chapter, identify the key takeaways and analyze them for your convenience. Visit our website at instaread.co. This is a Summary of W. Chan Kim & Renée A. Mauborgne's Blue Ocean Strategy: How to Create Uncontested Market Space And Make the Competition Irrelevant This global bestseller, embraced by organizations and industries worldwide, challenges everything you thought you knew about the requirements for strategic success. Now updated with fresh content from the authors, Blue Ocean Strategy argues that cutthroat competition results in nothing but a bloody red ocean of rivals fighting over a shrinking profit pool. Based on a study of 150 strategic moves (spanning more than 100 years across 30 industries), the authors argue

that lasting success comes not from battling competitors but from creating "blue oceans"-untapped new market spaces ripe for growth. Blue Ocean Strategy presents a systematic approach to making the competition irrelevant and outlines principles and tools any organization can use to create and capture their own blue oceans. A landmark work that upends traditional thinking about strategy, this bestselling book charts a bold new path to winning the future. Consider this your guide to creating uncontested market space-and making the competition irrelevant. Available in a variety of formats, this summary is aimed for those who want to capture the gist of the book but don't have the current time to devour all 320 pages. You get the main summary along with all of the benefits and lessons the actual book has to offer. This summary is intended to be used with reference to the original book. The collection you need to create more blue oceans. W. Chan Kim and

Renee Mauborgne changed the field of strategy and the language of business with their pathbreaking "blue ocean strategy," a model for creating uncontested markets that unlock new demand and new opportunities for growth. This book brings together three of their classic blue ocean strategy articles, all first published in Harvard Business Review. "Blue Ocean Strategy" highlights the distinct differences between market-competing (red ocean) and market-creating (blue ocean) strategy and what it takes to create the new markets of tomorrow. In "Red Ocean Traps," Kim and Mauborgne reveal the faulty assumptions that keep managers tethered to existing overcrowded markets (red oceans). "Blue Ocean Leadership" applies the concepts and analytic frameworks of blue ocean strategy to an innovative leadership approach that releases employees' untapped talent and energy while conserving their most precious resource--time. This collection

is the ideal start, or refresher, for creating more blue oceans. Chart a path to creating uncontested market space and winning the future. This collection of work by globally preeminent management thinkers W. Chan Kim and Renée Mauborgne brings together their perennial bestseller book *Blue Ocean Strategy* with their classic article "Blue Ocean Leadership." *Blue Ocean Strategy*, the global phenomenon that has sold over 4 million copies and is recognized as one of the most iconic and impactful strategy books ever written, argues that cutthroat competition results in nothing but a bloody red ocean of rivals fighting over a shrinking profit pool. Based on a study of 150 strategic moves (spanning more than 100 years across 30 industries), Kim and Mauborgne argue that lasting success comes not from battling competitors but from creating "blue oceans"—untapped new market spaces ripe for growth. The book presents a systematic

approach to making competition irrelevant and outlines principles and tools any organization can use to create and capture their own blue oceans. In the article "Blue Ocean Leadership," the authors apply their concepts and tools to what is perhaps the greatest challenge of leadership: closing the gulf between the potential and realized talent and energy of employees. The authors offer a systematic method for uncovering, at every level of the organization, which leadership acts and activities will inspire employees to give it their all and a process for getting managers throughout the company to undertake these tasks. "Presents a systematic approach to making the competition irrelevant and outlines principles and tools any organization can use to create and capture their own blue oceans." Book jacket. Why does value innovation play an important role for small and medium-sized enterprises (SMEs)? Innovation, besides imitation, is the foundation to

conduct business and produce goods and services. Each company needs at least at one point or another during its lifecycle innovation to stay competitive within a market. Its importance increases throughout time because of new companies accessing existing domestic markets by overcoming the market barriers and the international integration of markets for global trading. Aside the well-known forms of innovation, a new type called value innovation was developed and published in 2005. This new category is embedded as an essential part in a strategy theory recognized as Blue Oceans . This blue ocean strategy challenges companies to break out of their current market space. But is this kind of innovation really new and usable for general management consulting? The term value innovation is not new within business science. However value innovation is used at a smaller scale. Nevertheless its meaning within the new theory which defines a new way to

develop previously unidentified markets is crucial. It requires an overall new perspective of the management to plan and carry out its business processes. Therefore its advantages are only evident in a general strategy approach. Can this concept be turned into a consulting model to support SMEs? Why are SMEs the right target group? Small companies often seek a market niche which can be attained by differentiation in order to survive in competitive markets. Usually the managers are using business strategies like cost cutting or differentiation of products, processes or services to find this niche. This approach originates from the assumption that a group of buyers within the market is accessible or need the traded goods or services at another level of quality, prize, design or function. Could this new theory help establish new niches? The study will find answers to the questions in Chart a path to creating uncontested market space and winning the future. This collection of work by

globally preeminent management thinkers W. Chan Kim and Renée Mauborgne brings together their perennial bestseller book *Blue Ocean Strategy* with their classic articles “Blue Ocean Leadership” and “Red Ocean Traps.” *Blue Ocean Strategy*, the global phenomenon that has sold over 4 million copies and is recognized as one of the most iconic and impactful strategy books ever written, argues that cutthroat competition results in nothing but a bloody red ocean of rivals fighting over a shrinking profit pool. Based on a study of 150 strategic moves (spanning more than 100 years across 30 industries), Kim and Mauborgne argue that lasting success comes not from battling competitors but from creating “blue oceans”—untapped new market spaces ripe for growth. The book presents a systematic approach to making competition irrelevant and outlines principles and tools any organization can use to create and capture their own

blue oceans. In the article “Red Ocean Traps,” the authors show how managers’ mental models—ingrained assumptions and theories about the way the world works—undermine attempts to discover uncontested new market spaces. The authors provide a framework for avoiding spaces where competition is bloody (red oceans) and moving to blue ocean spaces with ample potential.
